

CUSTOMER SUCCESS STORY

Automotive Aftermarket Industry

CHALLENGE:

- Simplify product replenishment process
- Improve part presentation and eliminate scrap in the work cell
- Save Space in tight work area

SOLUTION:

- Pull material off-line and kit into carts
- Parts oriented for ergonomics and picking
- Full carts can be swapped out quickly
- No scrap from unpacked parts in the cell

IN THEIR WORDS

“Geolean rolled up their sleeves supporting our Kaizen event and sketched a kit cart to improve how we deliver materials. The new carts reduced space in the work cell by 25%, while a key benefit was reducing changeover time by 75%. The operators love the part presentation making it easier to identify product and storing ½ the inventory in the cell”

-- satisfied automotive aftermarket client

RESULTS

Productivity	Reduced Space	Inventory	Reduce Scrap
+75%	+25%	-50%	-100%
